

date:

print size: 143x25 mm

colour specification:

Outlines, lines, text or lettering printed on rotary screen print machines without the use of a backing colour with thickness under 1mm may result in reduced resistance to mechanical and chemical damage. For this reason, we recommend creating graphic documents with this minimum specified thickness for rotary screen printing.

NICKNACK does not guarantee the resistance to mechanical and chemical damage of graphics if lines, outlines or lettering are narrower than 1mm.
